Yes — **this is very feasible** and is actually one of the **most profitable and easiest ways to run a BBQ business**. What you're describing is commonly called **"BBQ Drop-Off Catering"** or **"Bulk BBQ Catering."** Many successful BBQ restaurants and food trucks operate this way because it requires **far less labor and equipment** than full-service catering.

Since you're already building the **Jiggling Pig BBQ brand** and planning the **mobile trailer**, this model fits extremely well with what you're doing.

BBQ Drop-Off Catering (Very Common Business Model)

Instead of providing servers, chafing dishes, and staff, you simply:

1. Cook the food
2. Package it in bulk pans
3. Deliver it
4. Customer serves themselves

This is **very common for:**

- Office lunches
- Construction sites
- Church events
- Birthday parties
- Corporate meetings
- Family reunions
- Graduation parties
- Small weddings
- Sports teams

Many BBQ places **only do drop-off catering unless the client pays extra**.

Why This Model Works Well

1️⃣ Much Less Labor

Full catering requires:

- Servers
- Setup staff
- Breakdown staff
- On-site cooking
- Insurance

Drop-off catering requires:

- Cooking
- Packing
- Delivery

Often **1–2 people can handle the entire job**.

2️⃣ Much Higher Profit Margins

Example:

50 person BBQ order

Item	Cost
Food cost	~$200
Packaging	~$30
Labor	~$100
Total cost	~$330

Customer price:

$900 – $1,200

Profit:

$500–$800 for one delivery

3️⃣ No Equipment Setup

You avoid:

- Tables
- Tents
- Buffet lines
- Sterno heaters
- Servers
- Cleanup

4️⃣ Easier Scheduling

You can deliver **multiple orders per day**.

Example schedule:

11:30 AM – corporate lunch delivery
2:00 PM – office meeting
5:00 PM – birthday party
6:30 PM – family reunion

What Most BBQ Drop-Off Caterers Provide

Typically you deliver food in:

- Aluminum pans
- Disposable serving utensils
- BBQ sauce bottles
- Plates/napkins (optional)

Example delivery package:

Pulled Pork
Brisket
Mac & Cheese
Collard Greens
Cornbread
BBQ Sauce
Serving Tongs
Disposable Plates
Napkins

Everything is **ready to serve**.

Packaging Used by Most BBQ Caterers

Common containers:

Full Pan (feeds ~40–50)

Half Pan (feeds ~20–25)

Examples:

- Aluminum steam pans
- Cambro insulated carriers (to keep hot)
- Foil lids

Since you mentioned Cambro before for your trailer, those are **perfect for this business model**.

Typical BBQ Drop-Off Menu

Example pricing structure:

Meats

Pulled Pork – $18/lb
Brisket – $26/lb
Ribs – $30/rack
Chicken – $15/lb

Sides (Half Pan feeds ~20)

Mac & Cheese – $40
Collards – $40
Potato Salad – $35

Baked Beans – $40
Slaw – $30

Example Package

“BBQ Party Pack – Serves 25”

$350–$450

Includes:

- Pulled Pork
- Chicken
- Mac & Cheese
- Baked Beans
- Slaw
- Cornbread

Delivery Fee Model

Most BBQ caterers charge:

Distance	Fee
0–10 miles	Free
10–20 miles	$25
20–30 miles	$50

Add-On Upsells (Very Profitable)

Since you're building the **mobile bar concept**, these could be huge.

Add-ons:

- Sweet tea gallons

- Peach tea gallons
- Banana pudding
- Peach cobbler
- Cornbread trays
- BBQ sauce bottles
- Disposable plates kits

Example:

Sweet Tea Gallon — $10–15

Cost to you:

$1–2

Huge margin.

Perfect Fit for Your BBQ Trailer

Your trailer could be used for:

1️⃣ Cooking large batches
2️⃣ Catering events
3️⃣ Delivering food
4️⃣ Festivals
5️⃣ Corporate events

You could run:

3 revenue streams

1️⃣ Drop-off catering
2️⃣ Mobile BBQ sales
3️⃣ Mobile bar rental

Typical Minimum Orders

Most BBQ caterers require:

Minimum $200 – $300 order

or

Minimum 15–20 people

What Makes This Model Even Better

You can create **online ordering for catering** on your website.

Since you're already building your **ecommerce system**, you could have:

```
Catering
  |
  |-- Party Packs
  |-- Bulk Meats
  |-- Bulk Sides
  |-- Sweet Tea Gallons
  |-- Dessert Trays
```

Customer selects:

- date
- time
- number of guests
- delivery address

Then checkout online.

Example Real Order

Corporate office lunch

5 lbs Pulled Pork
3 racks ribs
Half pan mac & cheese
Half pan baked beans
Half pan slaw
2 gallons sweet tea

Price:

$425

Your food cost:

$120–150

Profit:

$275+

Health Department Perspective

Most health departments allow this if you:

- Cook in approved kitchen
- Maintain food temps
- Use insulated carriers

This is much easier than running a full restaurant.

If You Want — I Can Also Show You

1️⃣ **How most BBQ restaurants structure their catering menu**
2️⃣ **How to price BBQ catering profitably**
3️⃣ **The equipment needed to start for under $1,500**
4️⃣ **How to book corporate catering clients easily**
5️⃣ **How to structure the catering section of your ecommerce site**

I can also show you something extremely useful:

👉 **The exact catering menu structure used by the most profitable BBQ caterers in the U.S.** (very simple and high margin).

Show me this:1️⃣ How most BBQ restaurants structure their catering menu2️⃣ How to price BBQ catering profitably3️⃣ The equipment needed to start for under $1,500 4️⃣ How to book corporate catering clients easily5️⃣ How to structure the catering section of your ecommerce site I can also

show you something extremely useful: 👉 The exact catering menu structure used by the most profitable BBQ caterers in the U.S. (very simple and high margin).

You're asking the **exact right questions** to build a profitable BBQ catering side of **The Jiggling Pig**. The most successful BBQ caterers keep things **extremely simple, scalable, and high-margin**. I'll show you the real structure many BBQ restaurants use.

1️⃣ How Most BBQ Restaurants Structure Their Catering Menu

The most profitable BBQ catering menus usually follow **4 simple sections**.

1. Party Packs (Most Popular)

These are **pre-built bundles** that customers can order quickly.

Example:

BBQ Party Pack – Serves 10

- 3 lbs Pulled Pork
- 2 Sides
- 10 Buns
- BBQ Sauce

Price: $150

Backyard BBQ – Serves 20

- 6 lbs Pulled Pork
- 2 racks ribs
- 3 Sides
- 20 buns

Price: $320

Pitmaster Feast – Serves 50

- 15 lbs Pulled Pork
- 8 racks ribs
- 4 large sides
- cornbread

Price: $750

These bundles sell **80% of catering orders**.

---

2 Bulk Meats (By the Pound)

Customers love ordering meat separately.

Example:

Pulled Pork — $18/lb
Brisket — $26/lb
Chicken — $15/lb
Ribs — $30/rack

Typical yields:

Meat	Servings per lb
Pulled pork	3–4
Brisket	2–3

---

3 Sides (Half Pan / Full Pan)

Half Pan feeds ~20
Full Pan feeds ~40

Example:

Mac & Cheese — $40 / $75
Baked Beans — $35 / $70
Potato Salad — $35 / $70
Coleslaw — $30 / $60
Collards — $40 / $75

Sides are **extremely profitable**.

4️⃣ Drinks & Desserts (Huge Margins)

Sweet Tea Gallon — $12
Peach Tea Gallon — $14
Banana Pudding Tray — $40
Peach Cobbler Tray — $45

Sweet tea costs **about $1.50–$2 to make**.

2️⃣ How to Price BBQ Catering Profitably

The industry rule:

👉 **Food cost should be 25–35%**

Example:

Pulled pork cost:

Item	Cost
Pork butt	$2.50/lb
Yield after cooking	~50%

Effective cooked cost:

~$5/lb

Sell price:

$18/lb

Profit margin:

70%+

Catering Example

Order:

- 10 lbs pulled pork
- half pan mac
- half pan beans
- buns

Customer price:

$260

Your cost:

Item	Cost
Pork	$50
Sides	$20
Packaging	$10

Total cost:

~$80

Profit:

$180

---

3 Equipment Needed to Start (Under $1,500)

You actually need very little.

Essential Equipment

Cambro Food Carrier

4

Cost: ~$200–$350

Keeps food hot **4–6 hours**.

Aluminum Catering Pans

Cost:

$50 bulk case

Sizes:

- Half pan
- Full pan

Chafing Dish Kits (optional)

ETHANOL GEL
Sterno
2
HOUR
*CLEANER BURNING
**BIOBASED FUEL

FancyHeat
METHANOL

FancyHeat
METHANOL

4

Cost:

$25–$40

Some clients want these.

Meat Clamshell Containers

For smaller orders.

Cost:

$60 case

Instant Read Thermometer

Cost:

$25

Large Coolers

Cost:

$80–$150

Used for:

- drinks
- sides
- transport

Total Starter Cost

Item	Cost
Cambro	$250
Pans	$50
Containers	$60
Thermometer	$25
Coolers	$150
Misc supplies	$200

Total:

👉 **~$735**

Very low startup.

4️⃣ How to Book Corporate Catering Clients Easily

Corporate clients are the **best BBQ customers**.

They order:

- weekly lunches
- meetings
- company events

Best Strategy

1. Office Lunch Catering

Drop off **sample trays**.

Example:

- pulled pork sliders
- mac & cheese
- beans

Bring menus.

Target:

- banks
- construction offices
- government offices
- real estate offices
- hospitals

---

2. Google Business Profile

Searches like:

“BBQ catering near me”

drive orders.

---

3. Office Managers

Office managers control catering budgets.

Send them:

“Corporate Lunch Menu”

Example:

Office BBQ Lunch

Serves 15–20

- Pulled pork sliders
- Mac & cheese
- Baked beans

$220

---

4. LinkedIn Outreach

Message local companies:

Example:

> Hi! We run Jiggling Pig BBQ and offer drop-off corporate lunches. If your office ever needs catering we’d love to provide a sample tray.

5️⃣ How to Structure Catering on Your Ecommerce Website

Since you’re already building your **React / Node ecommerce system**, this is very easy.

Recommended structure:

```
Catering
  |
  |-- Party Packs
  |-- Bulk Meats
  |-- Sides
  |-- Drinks
```

|-- Desserts

Example Product

Backyard BBQ Party Pack

Serves: 20

Includes:

- 6 lbs pulled pork
- 2 sides
- buns
- sauce

Price:

$320

Add-ons:

- extra sides
- sweet tea
- banana pudding

Checkout Options

Customer selects:

- delivery date
- delivery time
- number of guests
- address
- delivery instructions

Delivery Fees

Automated by ZIP code:

Example:

Distance	Fee
0–10 miles	Free
10–20 miles	$20
20–30 miles	$40

⭐ The Exact BBQ Catering Menu Structure Used By Top BBQ Restaurants

Most profitable BBQ places keep it to **7 core items**.

Example:

Meats

- Pulled Pork
- Brisket
- Ribs

Sides

- Mac & Cheese
- Baked Beans
- Slaw

Drink

- Sweet Tea

That’s it.

Simple menus:

- cook faster
- reduce waste
- easier inventory
- easier catering

Example Jiggling Pig Catering Menu

Party Packs

Backyard BBQ (serves 10) – $160
Family Reunion Pack (serves 25) – $395
Pitmaster Pack (serves 50) – $760

Bulk Meat

Pulled Pork – $18/lb
Brisket – $26/lb
Ribs – $30/rack

Sides

Mac & Cheese – $40 / $75
Baked Beans – $35 / $70
Slaw – $30 / $60

Drinks

Sweet Tea – $12/gallon
Peach Tea – $14/gallon

If you want, I can also show you something extremely powerful for your business:

1️⃣ **The BBQ catering marketing strategy that books $5k–$20k per month in orders**
2️⃣ **How to get your first 10 catering clients in 30 days**
3️⃣ **The most profitable BBQ catering items (profit margin chart)**
4️⃣ **How to turn your ecommerce website into a catering booking machine**
5️⃣ **The exact catering order form design used by BBQ restaurants**

Those strategies could fit perfectly with your **Jiggling Pig website you're building.**

I currently do Ribs, Pulled Pork, Pulled Chicken, Smoked Turkey Legs, Sausage, Smoked wings, mac n cheese, baked beans, Green Beans, Cole slaw, rolls . I have my own line of sauces (4 different ones) and I have my own line of teas. How can I create a catering menu and packages from these items. Also, can I build a catering calculator on my frontend for customers to use as well as a back end admin piece.

Yes — and with the items you already have, you can build a **very strong Jiggling Pig catering menu** without adding anything else right now.

You already have the right mix for catering because you have:

- core meats
- recognizable sides
- rolls
- signature sauces
- signature teas

That gives you enough to create:

- **party packs**
- **bulk pans**
- **per-person packages**
- **add-ons**
- **corporate lunch packages**

And yes, you can absolutely build a **catering calculator** on your frontend plus a **full admin management area** on the backend. That would fit very well with the ecommerce/admin system you're already building.

---

1. How to turn your current items into a catering menu

The easiest way is to structure the menu into 5 sections:

Meats

- Pulled Pork
- Pulled Chicken
- Ribs
- Smoked Wings
- Sausage
- Smoked Turkey Legs

Sides

- Mac & Cheese
- Baked Beans
- Green Beans
- Cole Slaw

Bread

- Rolls

Signature Sauces

- Sauce #1
- Sauce #2
- Sauce #3
- Sauce #4

Drinks

- Sweet Tea
- Peach Tea
- Other tea flavors you sell

That gives customers a clean ordering experience.

---

2. Best catering menu format for your business

I would recommend using **three ordering styles at the same time**:

A. Per-person packages

Best for offices, parties, reunions, birthdays.

B. Bulk trays / pans

Best for customers who already know what they want.

C. Specialty items by piece

Best for ribs, turkey legs, sausage, wings.

That combination gives you flexibility without making the menu confusing.

---

3. Recommended Jiggling Pig catering package structure

Package 1: Sandwich Pack

Best for office lunches and casual events.

Jiggling Pig Sandwich Pack

Serves 10, 20, 30, 50

Includes:

- choice of Pulled Pork or Pulled Chicken

- 2 sides
- rolls
- pick 2 sauces

Example pricing:

- Serves 10: $140–$170
- Serves 20: $275–$330
- Serves 30: $400–$480
- Serves 50: $650–$780

This should be one of your easiest and highest-volume packages.

Package 2: BBQ Classic Pack

Best for family functions and birthday parties.

Jiggling Pig BBQ Classic

Serves 10, 20, 30, 50

Includes:

- 2 meats
- 2 sides
- rolls
- 2 sauces
- optional tea add-on

Meat choices:

- Pulled Pork
- Pulled Chicken
- Sausage
- Wings

Example pricing:

- Serves 10: $180–$220
- Serves 20: $350–$425
- Serves 30: $500–$640
- Serves 50: $850–$1,050

Package 3: Pitmaster Pack

Best for premium events.

Jiggling Pig Pitmaster Pack

Serves 10, 20, 30, 50

Includes:

- 3 meats
- 3 sides
- rolls
- all 4 sauces or choice of 3
- tea

Can include premium meats like:

- ribs
- smoked turkey legs

Example pricing:

- Serves 10: $240–$300
- Serves 20: $475–$590
- Serves 30: $700–$880
- Serves 50: $1,100–$1,450

Package 4: Rib & Wing Pack

Best for game days, parties, and casual events.

Jiggling Pig Rib & Wing Party Pack

Serves 10, 20, 30

Includes:

- ribs
- smoked wings
- 2 sides
- rolls
- sauces

Example pricing:

- Serves 10: $220–$280
- Serves 20: $430–$550
- Serves 30: $650–$820

Package 5: Turkey Leg Pack

This is a differentiator because not everybody offers this.

Smoked Turkey Leg Feast

Serves 10, 20, 30

Includes:

- smoked turkey legs
- 2 sides
- rolls
- sauces

You could offer:

- 1 turkey leg per person
  or
- half turkey leg equivalent if you want smaller portions

This package can be marketed for festivals, family events, and specialty orders.

---

4. Offer bulk ordering too

This is important because some customers do not want packages. They want to build their own.

Bulk Meats

You can sell by:

- pound
- half pan

- full pan
- piece
- rack
- dozen

Example structure:

By the pound

- Pulled Pork
- Pulled Chicken
- Sausage

By the rack

- Ribs

By the dozen / 25 / 50

- Smoked Wings

By the piece

- Smoked Turkey Legs

This gives you flexibility.

A sample menu layout could be:

Bulk Meats

- Pulled Pork — by the pound
- Pulled Chicken — by the pound
- Sausage — by the pound or links
- Ribs — full rack / half rack / slab count
- Smoked Wings — dozen / 25 / 50 / 100
- Smoked Turkey Legs — each

Sides

- Mac & Cheese — half pan / full pan
- Baked Beans — half pan / full pan
- Green Beans — half pan / full pan
- Cole Slaw — half pan / full pan

Extras

- Rolls — dozen
- Sauce bottles — each flavor
- Tea — gallon

---

5. A practical package lineup for your exact menu

Here is the structure I'd recommend for you right now.

Drop-Off Package A – Sandwich Meal

- Pulled Pork or Pulled Chicken
- 2 sides
- rolls
- 2 sauces

Drop-Off Package B – Smokehouse Combo

- 2 meats
- 2 sides
- rolls
- 2 sauces

Drop-Off Package C – Premium Pit Pack

- ribs + pulled pork or chicken
- 3 sides
- rolls
- tea
- sauces

Drop-Off Package D – Wing Party Pack

- smoked wings
- sausage

- 2 sides
- rolls
- sauces

Drop-Off Package E – Turkey Leg Feast

- smoked turkey legs
- 2 sides
- rolls
- tea optional

This keeps the menu simple but still gives customers variety.

---

6. How to think about portions

For the calculator and package pricing, you need standard serving rules.

A simple starting point:

Meats

- Pulled pork: 1/3 to 1/2 lb per person
- Pulled chicken: 1/3 to 1/2 lb per person
- Sausage: 1 link or 1/3 lb per person
- Wings: 4 to 6 wings per person if part of combo, 8 to 10 if main meat
- Ribs: 3 to 4 bones per person if combo, 1/3 to 1/2 rack if main
- Turkey legs: 1 per person for large-appetite crowd, or 1 for every 2 people if mixed-meat package

Sides

- 4 oz per side per person
- if offering 2 sides, plan 8 oz total side volume per person

Rolls

- 1 to 2 per person

Tea

- 1 gallon per 8 to 10 people

These rules are exactly what your calculator should use.

---

7. How to price these packages

Your packages should be based on:

food cost + packaging + labor + delivery + margin

A good model is:

- target food cost: 25% to 35%
- add packaging
- add labor
- add delivery fee separately if possible

Example logic:

- basic package markup: 3x food cost
- premium rib/turkey leg packages: 3.25x to 3.75x food cost
- tea and sauces: high margin add-ons

Your own sauces and teas are a big advantage because they increase your perceived value and your profit.

You should position them as:

- **signature sauce selection**
- **house bottled teas**
- **Jiggling Pig originals**

That makes your catering feel branded instead of generic.

---

8. Suggested menu layout for customers

This is the kind of structure I would use on the site.

Catering Overview

Short intro:
“Jiggling Pig offers drop-off BBQ catering for offices, parties, reunions, birthdays, and events. Choose from party packages or build your own spread with smoked meats, homemade sides, signature sauces, and house teas.”

Section 1: Packages

- Sandwich Pack
- Smokehouse Combo
- Premium Pit Pack
- Wing Party Pack
- Turkey Leg Feast

Section 2: Build Your Own Catering

- choose meats
- choose sides
- choose rolls
- choose sauces
- choose teas

Section 3: Add-Ons

- extra meat
- extra sides
- extra rolls
- gallon teas
- bottled sauces

Section 4: Delivery

- minimum order
- delivery radius
- delivery fee
- ordering lead time

---

9. Yes, build a catering calculator on the frontend

This is absolutely a smart feature for your site.

What the customer-facing calculator should do

The customer selects:

- guest count
- event type
- appetite level
- meats
- sides
- rolls
- sauces
- teas
- delivery zip code
- date/time

Then the calculator shows:

- recommended quantities
- package options
- estimated price
- delivery fee
- subtotal
- ability to submit quote or place order

Example flow

Customer enters:

- 25 guests
- moderate appetite
- 2 meats
- 2 sides
- 2 gallons tea

Calculator returns:

- 8 lbs pulled pork

- 8 lbs pulled chicken
- 1 half pan mac
- 1 half pan beans
- 3 dozen rolls
- 2 gallons tea
- sauces included
- estimated total: $425

That is a very useful tool and can increase conversions.

---

10. Backend admin piece you should build

Yes, you should definitely have an admin module for this.

Admin features to include

Menu management

- enable/disable items
- set prices
- set portion rules
- define premium items
- define package inclusions

Package builder

- create package names
- choose included meats
- choose included sides
- define guest count tiers
- set base pricing
- set optional upgrades

Portion calculator rules

Store rules like:

- pulled pork per person
- wings per person
- tea gallons per guest count

- roll count per person

Quote management

- draft quote
- pending quote
- approved
- rejected
- converted to order

Delivery settings

- service radius
- delivery fees by mile/zip
- minimum order amount
- lead time rules

Calendar/date blocking

- unavailable dates
- max catering orders per day
- cutoff times

Customer requests

- setup requested yes/no
- disposable utensils yes/no
- extra sauce yes/no
- allergy notes
- event notes

---

11. Suggested data model for the catering system

Since you asked about frontend and backend, here’s a clean structure.

Core tables

- CateringMenus

- CateringMenuItems
- CateringPackages
- CateringPackageItems
- CateringPackageServingTiers
- CateringPortionRules
- CateringAddOns
- CateringQuotes
- CateringQuoteItems
- CateringEvents
- CateringDeliveryZones
- CateringAvailabilityRules

Important supporting fields

CateringMenuItems

- Id
- Name
- Category
- PricingType
- UnitPrice
- IsPremium
- IsActive
- MinOrderQty
- MaxOrderQty
- PortionUnit
- DisplayOrder

Portion rules

- ItemId
- MinGuests
- MaxGuests
- QtyPerPerson
- UnitOfMeasure
- AppetiteLevel

Packages

- Name
- Description
- BaseGuestCount
- IncludedSidesCount

- IncludedSaucesCount
- IncludesRolls
- IncludesTea
- BasePrice

Quotes

- Customer info
- event date
- guest count
- selected items
- computed quantities
- delivery fee
- total
- status

---

12. Best frontend UX approach

For your React storefront, I would recommend 3 entry paths:

Option 1: Shop Packages

Customer picks a ready-made package.

Option 2: Build Your Own

Customer builds catering from scratch.

Option 3: Catering Calculator

Customer answers a few questions and gets a recommendation.

That gives you both simplicity and flexibility.

---

13. Smart upsells you should include

Because you already sell sauces and teas, your upsells are strong.

At checkout show:

- add a gallon of tea
- add bottled sauce
- add extra rolls
- add an extra half pan of mac & cheese
- add wing tray
- add turkey legs
- add dessert later if you expand

This is where your average order value can grow quickly.

---

14. My recommendation for your exact business

For Jiggling Pig, I would start with this simplified live menu:

Packages

- Pulled Pork Sandwich Pack
- Pulled Chicken Sandwich Pack
- Smokehouse Combo Pack
- Rib Party Pack
- Wing Party Pack
- Turkey Leg Feast
- Pitmaster Pack

Build Your Own

- meats by pound/rack/dozen/piece
- sides by half/full pan
- rolls by dozen
- tea by gallon
- sauce by bottle / included selections

This lets you start simple and expand later.

15. Best next step

Your best next step is to build these 4 things first:

1. a final catering menu structure
2. standardized portion rules
3. pricing formulas
4. frontend calculator + backend package management

That will give you a real catering system, not just a menu page.

I can map this out for you next as either:

- a full **customer-facing catering menu**
- a **database schema for the catering calculator and admin**
- a **React UI wireframe for the catering calculator**
- or the **business rules and formulas** for guest counts, portion sizing, pricing, and delivery fees.

React UI wireframe for the catering calculator
Jiggling-pig-catering-calculator-wireframe· typescript

```
export default function JigglingPigCateringCalculatorWireframe() {
<section className={`${section} sticky top-6 p-5 md:p-6`}>
<div className="mb-5 flex items-center justify-between">
<div>
<h2 className="text-xl font-semibold">Live Estimate Panel</h2>
<p className="mt-1 text-sm text-neutral-600">Persistent quote summary visible while the user
builds.</p>
</div>
<span className="rounded-full bg-emerald-100 px-3 py-1 text-xs font-semibold
text-emerald-700">
Auto-updates
</span>
</div>

<div className="space-y-4">
<div className="rounded-2xl bg-neutral-900 p-5 text-white">
<p className="text-xs uppercase tracking-[0.18em] text-neutral-300">Estimated Total</p>
<div className="mt-2 text-3xl font-bold">$485.00</div>
<p className="mt-2 text-sm text-neutral-300">For 25 guests · Moderate appetite · Drop-off
delivery</p>
```

```
</div>

</aside>
</div>
</div>
</div>
);
}
```

I put together a React wireframe for the catering calculator in the canvas.

It includes:

- event details
- ordering style selection
- meats, sides, sauces, rolls, and tea selections
- a live estimate panel
- recommended quantities
- suggested package cards
- quote submission fields
- admin/back-office integration notes

For your Jiggling Pig setup, this layout is a strong fit because it supports both:

- **ready-made packages**
- **build-your-own catering quotes**

The next best step is to turn this wireframe into a real component set, such as:

- `CateringCalculatorPage`
- `EventDetailsForm`
- `MenuSelector`
- `EstimateSidebar`
- `QuoteContactForm`

Then connect it to business rules like:

- pounds of meat per guest
- wings per guest
- half-pan/full-pan thresholds
- tea gallons by guest count
- delivery fee by ZIP code

I can turn this wireframe into an actual production-ready React component structure with Tailwind and sample data next.
